

## Let's Make Parliament Work - Support Democracy Now!

With the real possibility of a Coalition government presented before us, we may soon have the most democratic government we have ever witnessed in the history of Canada. Rather than having a government that represents the voice of a small minority, we could have a government that represents the majority of voters in our country. Canada needs strong leadership and a responsible fiscal plan that can see us through these precarious and uncertain times. Not only have the Conservatives miserably failed to deliver a credible economic package, but at the first opportunity, they aspired to undermine the fundamental rights of Canadians. This is only the beginning unless we stand up and voice support for a truly democratic government that is capable of protecting the economy and preserving our rights.

This is a critical time to make our voice heard. Please go to [www.makeparliamentwork.ca](http://www.makeparliamentwork.ca) and send an e-mail message to your MP supporting a coalition government from this site, and send the link to your friends. **Our time to act is NOW!**

**A rally will be held in Yellowknife** on Friday, December 5th, in front of Dennis Bevington's constituency office at 12 noon, with speakers and chilli. Please attend and lend your support!
